DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Otsuka (6,466,487).

Otsuka shows a resistance calibration circuit in a semiconductor device comprising:

a correction code generating means (Fig. 8) for generating a plurality push-up code signals (U0 to UM-1) and a plurality pull-down code signals (D0 to DN-1) based on an external reference resistor (RQ, Fig. 8), wherein a reference voltage (REFIU or REFID) is applied to the correction code generating means;

a push-up decoder (1a-1 to 1a-5) for decoding the plurality push-up code signals from the correction code generating means;

a pull-down decoder (1b-1 to 1b-5) for decoding the plurality pull-down code signals from the correction code generating means; and

a resistance adjustor (1a-6 to 1b-10) for receiving a push-up signal from the push-up decoder and a pull-down signals from the pull-down decoder and for turning on/off a plurality of inner transistors (1a-11 to 1b-15).

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 6-7 are allowed.

5. The following is an examiner's statement of reasons for allowance: with respect to claim 6, in addition to other limitations in the claim, the prior art fails to teach or disclose the applicant's invention as claimed, particularly describing the connection of a first resistor, a second resistor, push-up transistors, and pull-down transistors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
